HE The Ambassador of the Republic of Korea in Sri Lanka

Your Excellency,

**Investment Opportunity for Generate and Supply Electrical Energy from Renewable Energy Resources on Build Own and Operate Basis (BOO) to achieve the Policy target of Meeting of 70% of Electricity from Renewable Resources.**

As HE the President, Gotabaya Rajapaseke declared the Government of Sri Lanka has targeted to achieve 70% of electricity demand of the Country by 2030 from Renewable Energy (RE) sources.

As per the directives given by HE the President this ministry has taken several initiatives to meet the policy target. Under that endeavor the RE development programs have been implemented focusing local and foreign private sector investors.

As a key program GOSL has decided to invite private sector investors to submit proposals for RE projects of different RE resources such as Ground mounted Solar, Floating Solar, ground based wind, offshore wind etc. The invitation had been published in the extraordinary gazette (Annex1) on 24.09.2021 and the document (Annex 2) can be downloaded from the web site of Sri Lanka Sustainable Energy Authority ([www.energy.gov.lk](http://www.energy.gov.lk)).

The closing date of the submission of proposals is 01.11.2021 and necessary arrangements have been made to have, Proposal pre submission meeting with prospective investors.

One of the key imperative requirement is to make aware all the prospective investors who are keen to make their investments in RE development.

Therefore I wish to get your full support to make aware the prospective investors in Korea to encourage to submit proposals.

I will be grateful if your Excellency could take appropriate action to make aware the potential investors, chamber of commerce, Trade associations and investments federations about this new initiative.

I avail myself of this opportunity to renew the assurances of its highest corporation to your Excellency.

Thank you.

Yours faithfully,

**Duminda Dissanayake**  
**State Minister of Solar, Wind and Hydro Power Generation projects development**
